

# Watershed Characterization Map Index

| <b>Map</b> | <b>Title</b>                                       |
|------------|----------------------------------------------------|
| Map 1      | Quinte Conservation Watersheds                     |
| Map 2      | Bedrock Geology                                    |
| Map 3      | Bedrock Topography                                 |
| Map 4      | Surficial Geology                                  |
| Map 5      | Overburden Thickness                               |
| Map 6      | Land Slope Classes                                 |
| Map 7      | Physiographic Regions                              |
| Map 8      | Soil Types                                         |
| Map 9      | Quinte Conservation Dams                           |
| Map 10     | Water Well Distribution                            |
| Map 11     | Water Table Elevation                              |
| Map 12     | Significant Hydrologic Features                    |
| Map 13     | Climate Stations                                   |
| Map 14     | Wetlands                                           |
| Map 15     | Woodlands & Riparian Areas                         |
| Map 16     | Stream Temperature                                 |
| Map 17     | OBBN Sites                                         |
| Map 18     | Rare Species Occurrence                            |
| Map 19     | Invasive Species                                   |
| Map 20     | Population Density                                 |
| Map 21     | Land Use                                           |
| Map 22     | Landfills                                          |
| Map 23     | Mines and Aggregates                               |
| Map 24     | Municipally Serviced Areas                         |
| Map 25     | Stormwater Ponds                                   |
| Map 26     | Recreational Land Use                              |
| Map 27     | Protected Lands                                    |
| Map 28     | Tweed WHPA                                         |
| Map 29     | Madoc WHPA                                         |
| Map 30     | Peats Point WHPA                                   |
| Map 31     | Deloro WHPA                                        |
| Map 32     | Surface Water Sources                              |
| Map 33     | PWQMN Stream & River Sites                         |
| Map 34     | Ontario Lake Partner Program Trophic Levels        |
| Map 35     | PGMN Network                                       |
| Map 36     | Vulnerable Aquifers                                |
| Map 37     | Drinking Water Information System Plant Location   |
| Map 38     | Water Takings                                      |
| Map 39     | Spatial Distribution of Annual Groundwater Usage   |
| Map 40     | Spatial Distribution of Annual Surface Water Usage |
| Map 41     | Wellhead Protection Areas                          |
| Map 42     | Surface Water Intake Locations                     |
| Map 43     | Areas of Significant Recharge                      |
| Map 44     | Well Density Map                                   |
| Map 45     | Contamination Sites                                |
| Map 46     | Issues and Concerns                                |

This map booklet was prepared in March of 2008 to accompany the Quinte Region Watershed Characterization Report Version 1.1. All maps are explained in detail throughout the text.
